

Helping To Identify Key Solutions....

Test & Engineering Solutions

What We Do.

Our thorough understanding of T&E allows us to identify key solutions that improve business practices while saving time and money for our customers.

T&E Services Include:

- Test Execution
- Test Operations/Launch Support
- Weapon System Testing Support and Analysis
- Developmental, Technical, and Operational Testing
- Test Programmatic Planning and Test Event Planning
- Pre-mission Predictions and Analyses
- Test Integration
- Onsite Test Support and Quicklook Analysis
- Post-test Detailed Analyses
- Post Test Reconstruction Using Modeling and Simulation
- Test Infrastructure Development
- Software Tools Development

Action Technologies Test and Evaluation (T&E) professionals perform in a variety of technical, analytical and programmatic areas to meet customer's expectations and engineering requirements.

Our T&E professionals offer on-site technical, process, administrative, budget and cost analysis support as well as requirement studies.
